

— An OHI Company —

The Orthotic Group custom-manufactures orthotic sandals and clogs from genuine Birkenstock & Naot® footwear. As with all custom-made orthotics, the process begins when your practitioner casts your feet.

Once we receive your cast impressions, our experienced technicians use the latest technology to fabricate custom orthotic footbeds that accurately capture the contours of your feet. Through a proprietary process, the orthotics are then “married” to the appropriate components of your selected sandals or clogs.

When you don't wear shoes, you're not wearing your orthotics either; this means no therapy! During evening hours at home when you're often barefoot or in slippers, on casual weekends or in hot weather, you can - and should! - supplement your orthotic therapy with TOG custom sandals & clogs.

BIRKENSTOCK

Naot - Geneva

- 1. A firm, yet lightweight and resilient EVA sole designed to absorb shock
- 2. A supple suede liner covers the entire custom footbed
- 3. Top-quality suede and nubuck leather uppers are tanned all the way through for a remarkably durable sandal
- 4. A custom-made footbed is made from cork and allows your feet to function better
