Medical Compression Therapy Seminar

Canada’s #1 orthotic lab brings you a course designed to increase your compression hosiery knowledge.

SEMINAR INFORMATION:
Friday, October 21st, 2011
Markham, ON
Delta Markham Hotel

Use practical expert content and industry best practices to treat your patients. Key learning objectives include:

1. Addressing lower extremity health problems and the vast therapeutic advantages of compression therapy

2. Providing an understanding of who should wear compression hosiery and when

3. Demonstrating the proper fitting and sizing techniques and providing each participant with one complimentary pair of the compression product
The Medical Compression Therapy Seminar is designed to deliver up-to-date information on the circulatory system and leg health. Medical grade compression garments help many patients effectively improve on the venous and lymphatic blood flow of the lower extremities and are used to prevent and treat poor circulation. Compression garments help relieve and control edema, swelling, varicose veins, leg fatigue and other problematic leg conditions.

The Orthotic Group would like to invite you to learn about a new compression hosiery product.

About the Seminar

The Medical Compression Therapy Seminar is designed to deliver up-to-date information on the circulatory system and leg health. Medical grade compression garments help many patients effectively improve on the venous and lymphatic blood flow of the lower extremities and are used to prevent and treat poor circulation. Compression garments help relieve and control edema, swelling, varicose veins, leg fatigue and other problematic leg conditions.

The Orthotic Group would like to invite you to learn about a new compression hosiery product.

Who Should Attend

Suzie Kalman is the owner and founder of The Gemini Group, a company whose concept is the promotion of good health. The business focuses on providing exceptional service, individual attention and education to all clients to prevent, improve, or support circulatory and leg health.

Focusing on prevention, The Gemini Group is committed to helping a person manage their health today so that they are not managing their illness tomorrow.

Suzie Kalman began her career in health care, graduating with honors from the University of Toronto in both physiotherapy and occupational therapy. Suzie’s clinical experience included extensive involvement in the assessment and treatment of clients with physical and mental disabilities.

For 8 years, Suzie was a Teaching Master at McMaster University in the School of Medicine, working with a broad range of students in the faculty of Health Sciences.

No stranger to corporate environments, Suzie has held senior positions with a variety of Fortune 500 companies, such as Sara Lee and Bausch and Lomb as their National Corporate Account and/or National Sales Manager.

Passion is important in business, and Suzie is passionate about circulation and leg health. She is currently working with clients in numerous settings from vascular/surgical clinics; hospital wound care teams as well as delivering service to clients in their own homes.

In addition to providing in-service educational programs for health professionals on leg and circulatory health, Suzie is also working with a variety of medical teams in all venues to provide services for clients requiring specialty garments and custom fittings.

Each attendee will choose 1 of the following complimentary products!
